This year's symbolic guideline is given by the painting

## „tree of life“

The tree of life, which has magic importance in different cultures and myths, will act as the common focus for artists and audience.

So besides the already traditional main focus on cross-cultural issues, the eyes of the festival will concentrate on a broader spiritual consciousness and inspirit awareness.

The artistic expression in music and dance performances, rituals, installations, movies...yadda-yadda-yadda... will raise a deeper understanding for the diverse range of beliefs and values.

The diversity of different religious cultures will be reinvestigated in so called „talking circles“ (gently guided communication) which will be a core in between the artistic workshops.

We will try to make spirituality in all its aspects rootedly perceptible, using different techniques of guided meditation.

### Preview:

As we think that this year's theme is quite extensive, we want to dedicate it as a trilogy. The first part will be „The calling“ (2008), part two „The meeting“ (2009) and part three „The transmission“ (2010)
